DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-10, 13, and 14, drawn to a method for checking data.

Group 2, claim(s) 11-12, drawn to a transmitter.

Group 3, claim(s) 15-18, drawn to a station.

The inventions listed as Groups 1-3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group 1 lacks the concept of deriving an authentication value, as well as lacking the transceiver and station of groups 2 and 3. Groups 2 lacks the checking of group 1, and the receiver and second reference value of group 3. Group 3, 2 and 1 lack subject matter common to all claims. The method of claims 1-10 has been linked to claims 13 and 14. Claims 11, 13, and 15, lack a single inventive concept. Instead claims 11 and 13 seem to be claiming 2 separate inventions, and 15 is a combination of the two.

2. A telephone call was made to Michael C. Stuart on 31 August 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
